

Subsoiler "Delta"

3-5-7-9 Tines

- ➔ Easy to tow
- ➔ Effortless
- ➔ Deep loosening (30-60cm) and stubble (10-25) in one operation

Due to the special form of tines swords (shear pin safety $\varnothing = 25$ mm) and the special arrangement of the delta frame (passage 80 cm) results in an excellent catchment, even at very hard and solidified soils.

„Delta“ hydr. foldable
