

“Disko“

Working width 3,00 up to 6,00m

Correct ratio of target size to angle of attack and angle of inclination to the disc spacing.

- ➔ stable form tube base frame (forming tube 80 x 80)
- ➔ diagonally set, ball bearing hollow discs (Ø = 540 mm)
- ➔ lateral boundary slices (no throwing over)
- ➔ simultaneous application of an intercrop into the stubble (pneumatic seeder „Air 8“)
- ➔ intensive mixing of crop residues with the ground
- ➔ short compact design with favorable Center of gravity

3m „Disko“ with pneum. Seeding machine „Air 8“

6m „Disko“ semi-mounted in working position
